

COVID19: COVID19 September 2021 risk assessment and action planning tool

SCHOOL NAME: St Joseph's Catholic Primary School

DATE: Revised October 2021

Purpose of this document:

This COVID19: Risk Assessment and Action Plan document sets out the decisions taken and measures **to plan for the full return to onsite education from March 8th and ensure the school continues to operate as safely as possible following full opening.** Plans and measures in place should be reviewed on a regular basis, particularly as new guidance is issued.

In line with DfE guidance, schools and trusts need to work closely with parents, staff and unions as they normally would, when agreeing the best plan for their school's circumstances. Risk assessments and plans need to be confirmed with the governing bodies/academy trusts and published in schools with over 50 employees.

Existing policies and guidance continue to apply alongside the actions within this document, including but not limited to:

- Health and Safety Policy
- First Aid Policy
- Child Protection Policy
- DfE Guidance relating to COVID19
- Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR) 2013
- The Health Protection (Notification) Regulations 2010
- Public Health England (PHE) (2017) 'Health protection in schools and other childcare facilities'

The considerations and example measures in this tool are not exhaustive and must be read in conjunction with the latest government guidance:

[Actions for schools during coronavirus outbreak](#)

[NHS test and trace for people who develop symptoms of coronavirus](#)

[Safe working in education, childcare and children's social care](#)

[What to do if a pupil is displaying symptoms of coronavirus \(COVID-19\)](#)

[National lockdown](#)

[Guidance on protecting extremely vulnerable persons](#)

[Asymptomatic testing in schools and colleges](#)

[RIDDOR reporting of COVID-19](#)

The following principles underpin all planning and actions:

- Children's needs are paramount.
- Staff physical and emotional well-being must be considered at all stages of planning and implementation.
- Risk assessment and planning should be undertaken in consultation with staff, Health and Safety/ Union representatives, governors and parents.

System of controls

This is the set of actions schools must take. They are grouped into 'prevention' and 'response to any infection'.

Prevention

You must always:

1. Minimise contact with individuals who are required to self-isolate by ensuring they do not attend the school.
2. Ensure face coverings are used in recommended circumstances.
3. Ensure everyone is advised to clean their hands thoroughly and more often than usual
4. Ensure good respiratory hygiene for everyone by promoting the 'catch it, bin it, kill it' approach.
5. Maintain enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as detergents.
6. Consider how to minimise contact across the site and maintain social distancing wherever possible.
7. Keep occupied spaces well ventilated.

In specific circumstances:

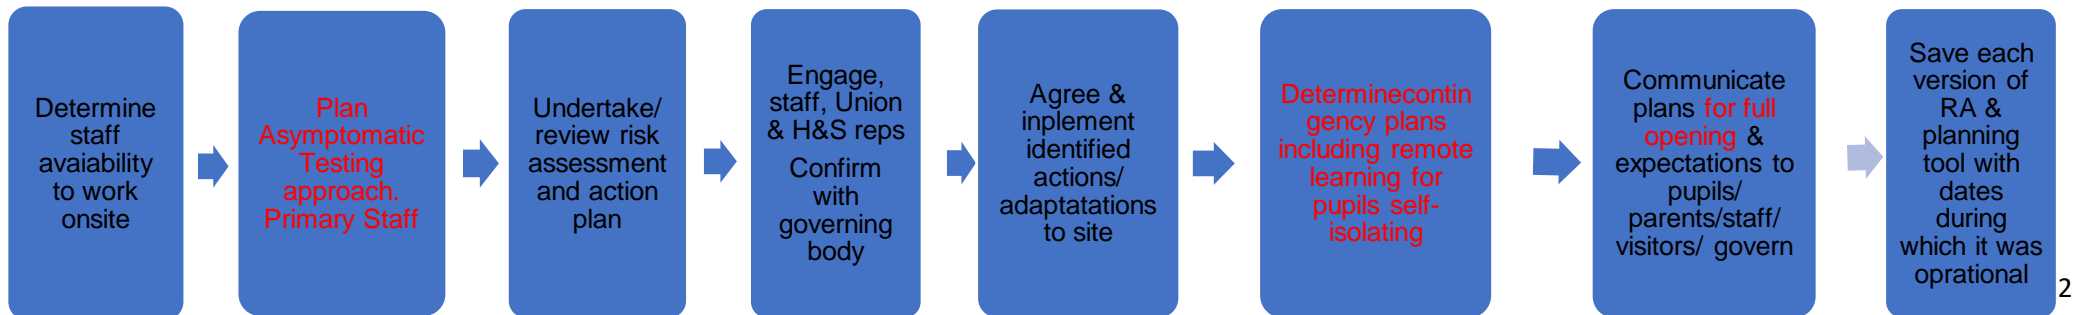

8. Ensure individuals wear the appropriate personal protective equipment (PPE) where necessary.
9. Promote and engage in asymptomatic testing, where available.

Response to any infection

You must always:

10. Promote and engage with the NHS Test and Trace process.
11. Manage and report confirmed cases of coronavirus (COVID-19) amongst the school community.
12. Contain any outbreak by following local health protection team advice.
